**Quotient Sciences Announces Multimillion-Pound Investment
in Drug Substance Manufacturing Facility**

NOTTINGHAM, U.K.; Aug. 25, 2021 – [Quotient Sciences](#), the drug development and manufacturing accelerator, announced a £6.3 million-pound investment in its recently acquired manufacturing facility in Alnwick, U.K. The investment will significantly expand Quotient’s drug substance manufacturing capability and will create 80 new jobs over the next three years.

Quotient acquired the [Alnwick facility from Arcinova in February 2021](#) to expand its service portfolio to include drug substance, drug product and clinical testing capabilities all under one organization. The acquisition enables Quotient to support customers with an “end to end” offering from candidate selection through commercial product launch. The multimillion-pound investment will repurpose a 1,500 square-meter footprint and incorporate additional equipment and technologies — significantly expanding the number of new molecules developed each year.

Additional equipment, featuring the latest advances in digital control and data capture, will ensure robust transfer from laboratory to multi-kilo scale production. Plus, processing equipment with new developments in modular continuous technology will maximize responsiveness and agility for manufacturing processes. These updates, combined with a five-fold increase in scale, will increase Quotient’s capacity by over 10 times for developing complex medicines.

“Following our integration into Quotient Sciences earlier in the year, it is tremendously exciting to see the Alnwick facility continue to expand capabilities as we move into larger scale and commercial manufacturing,” said Quotient Sciences SVP Candidate Development Services Roger Kilburn.

“Science and agility are at the core of Quotient Sciences, and our team strives to innovate and develop smarter approaches to process R&D for our customers and drive the adoption of continuous processing technologies.”

The Alnwick facility employs 170 people across a range of scientific disciplines, and this investment will create a variety of new jobs. Quotient continues to grow and was recently presented an award for “Most Inspirational North East (U.K.) Science Employer,” from STEM Learning, as part of the STEM Ambassadors program.

About Quotient Sciences

[Quotient Sciences](#) is a drug development and manufacturing accelerator providing integrated programs and tailored services across the entire development pathway. Cutting through silos across a range of drug development capabilities, we save precious time and money in getting drugs to patients. Everything we do for our customers is driven by an unswerving belief that ideas need to become solutions, and molecules need to become cures, fast. Because humanity needs solutions, fast.
